Projector and Vectographic Slides

Stereo Optical vectographic projector slides are designed so that the projector can administer both basic acuity projector slide exams and vectographic exams without changing slides. All slides are printed on a select piece of high-quality clear photographic film using two sheets of optically-clear glass to guarantee consistently high quality optotypes and ensure the integrity of each test.

8400   8500   8600   8700   8800   8900

PROJECTOR SLIDES:

**8400 - Acuity Astigmatism:** Letter acuity, astigmatic clock, number acuity, tumbling "E" tests

8500 - Adult: Letter acuity, number acuity, tumbling "E" tests

8600 - Child Acuity: Allen, tumbling "E", Landolt "C" tests

8700 - Family Practice: Letter acuity, astigmatic clock, tumbling "E", Allen tests

8800 - Multi-Acuity: Letter acuity, tumbling "E", Allen tests

8900 - Acuity Vergence: Letter acuity, astigmatic clock, vergence tests

9100   9200   9300   9400

VECTOGRAPHIC SLIDES:

9100 - *Adult: Letter acuity, astigmatic clock, binocular balance, suppression, fixation disparity, stereopsis

9200 - *Pediatric: tumbling "E" acuity, binocular balance, suppression, fixation disparity, stereopsis

9300 - Adult: Letter monocular acuity, binocular astigmatism, acuity balance, suppression, binocular acuity, fixation disparity, muscle balance, stereopsis

9400 - Pediatric: Binocular balance, tumbling "E" monocular acuity, binocular acuity, fixation disparity, stereopsis

*The top half of the slide is for standard projection while the bottom half is for vectographic projection.
